Inaugural CADRE Conference April 11-12

[Register Online](#)

Register today to attend the inaugural CADRE Conference at OSU. April 11th will feature an evening networking reception and poster session. April 12th will be a full day of conference activities including speakers from around the country and a series of exciting breakout sessions. Registration is free. Lunch is provided.

The CADRE conference brings together regional CI practitioners, Librarians, researchers and educators interested in the advancement of the following: high performance computing, high speed networks, data analysis and visualization, creating and implementing data management plans, applying best practices for organizing data, and storing, archiving and sharing data once a project is completed.

HPCC featured in OSU Research Matters

Read about the latest updates from the OSU HPCC as it prepares for its new supercomputer cluster in OSU Research Matters (formerly Vanguard Magazine), a publication by the OSU Research Communications office. Read more by clicking the image below.

Upcoming Events

February 23, 2017

March 16-17, 2017

Software Carpentry Workshop

8:30a.m.-4p.m. (both days)

206 OSU Library

Register at: osu-swc.github.io/2017-03-16-okstate

THE SCRATCH DIRECTORY: When to keep and when to purge

The /scratch/ directory is a shared resource and should NOT be used as a long-term storage option. A full /scratch/ can prevent other researchers from running jobs:

When to keep things in scratch?

- Files you are using to run active jobs
- Files you are setting up in order to run a job

When to move things out of scratch?

- Files you are no longer using

Questions or Suggestions?

Email hpcc@okstate.edu to be connected to an OSU HPCC staff member ready to help.
